

Portlog — Master Data User Manual

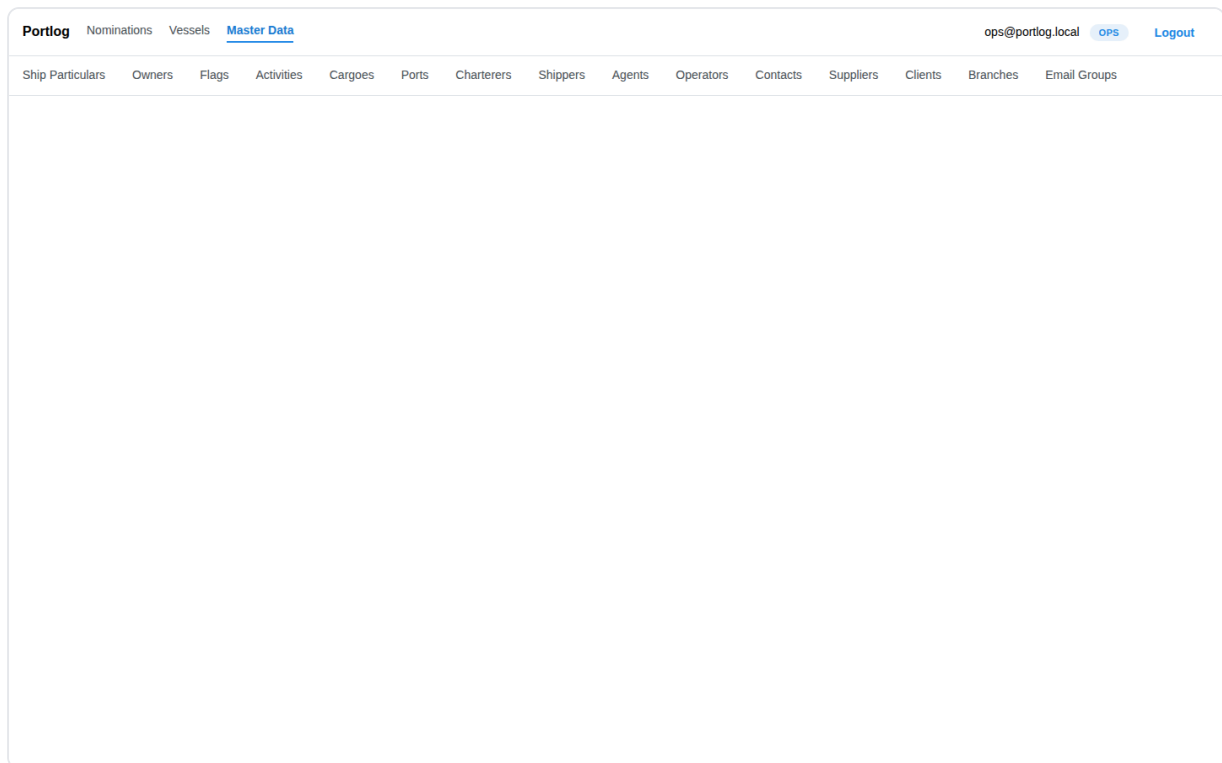

Master Data is the reference layer that everything else in Portlog depends on. Vessels, ports, owners, operators, branches, and email groups are all defined here. Get these right and the rest of the system flows naturally.

Table of Contents

1. Navigating Master Data
 2. Common Interface Pattern

 17. Suppliers
 18. Permissions Summary
-

1. Navigating Master Data

Click **Master Data** in the top navigation bar to open the module. A second tab bar appears below the main nav with all 14 entity types.

Click any tab to open that entity. The page redirects to an empty form ready for a new record, or click a name in the left list to load an existing record.

2. Common Interface Pattern

Almost every entity in Master Data uses the same two-panel layout.

Left panel — list

- All records sorted alphabetically by name
- **FLASH SEARCH** input at the top — type to filter the list instantly
- Click any name to load it into the right panel

Right panel — form + button bar

The button bar at the top of the right panel is the same on every entity:

Button	Action
Print	Print the current record
Prior	Load the previous record in the list
Next	Load the next record in the list
First	Jump to the first record
Last	Jump to the last record
New	Clear the form to create a new record
Cancel	Discard unsaved changes
Accept	Save the current record

Required fields are marked with a red asterisk *. The **Accept** button stays disabled until all required fields are filled.

3. Ship Particulars (Vessels)

The vessel registry. Every nomination references a Ship Particular, so this is where you start when a new vessel needs to be added.

Internal notes

Fields

Field	Required	Notes
Name	Yes	Full vessel name (e.g., MV Liberian Star)
Abbreviation	No	Short ID (e.g., LBSTAR)
Call Sign	No	Uppercase alphanumeric, 3–15 chars; must be unique
IMO Number	No	Exactly 7 digits; must be unique
Flag	Yes	Select from the Flags list
Owner	No	Select from the Owners list
Operator	No	Select from the Operators list
LOA (m)	No	Length Overall in metres
DWT	No	Deadweight Tonnage
GRT	No	Gross Register Tonnage
NRT	No	Net Register Tonnage
Email	No	Vessel email address
Phone / Phone 2 / Fax	No	Contact numbers
Comments	No	Internal notes

Refresh from Datalastic (AIS Lookup)

When a valid 7-digit IMO is entered and differs from the saved value, a **Refresh from Datalastic** button appears. Click it to fetch the latest vessel data from the AIS provider — name, call sign, dimensions, and flag auto-populate from the result. Review the values and click **Accept** to save.

Adding a New Vessel

1. Click the **Ship Particulars** tab.
2. Click **New** in the button bar.
3. Enter Name and select Flag (required).
4. Add the IMO number if available — this enables the Datalastic refresh.
5. Link Owner and Operator if known.
6. Click **Accept**.

4. Ports

Port facilities where vessels call. Each port can have multiple **Piers** (berths/terminals).

New pier name...

Fields

Field	Required	Notes
Name	Yes	Full port name
Acronym	No	Short code used throughout the app (e.g., NPA, MVD)
Country	No	Country or region
Email Group	No	Default email group for port authority recipients
Comentarios	No	Internal notes

Managing Piers

Below the port fields, the **Piers** section lists all berths/terminals for this port:

- **Add a pier** — type a name in the "New pier name..." input and click + (or press Enter)
- **Remove a pier** — click the red ✕ next to its name
- Changes to piers are saved atomically when you click **Accept**

Adding a New Port

1. Click the **Ports** tab.
2. Click **New**.
3. Enter Name (required) and Acronym.
4. Add Country and Email Group if known.
5. Add piers as needed.

6. Click **Accept**.

5. Branches

Company branch/office locations. The Branch determines which branch documents are available in a nomination and which templates the agency uses.

Fields

Field	Required	Notes
Name	Yes	Full branch name (e.g., Nueva Palmira Branch)
Code	Yes	Unique short code (e.g., NPA); used in nomination references
Comments	No	Internal notes

The list shows each branch as **CODE — Name** for easy identification at a glance.

Adding a New Branch

1. Click the **Branches** tab.
2. Click **New**.
3. Enter Name and Code (both required). The code must be unique.
4. Click **Accept**.

6. Owners

Vessel owners. Includes CRM fields for relationship management and permission-gated financial data.

Email	Email address
Home Phone	Home phone
Mobile	Mobile number
Business Phone	Business phone
Business Fax	Business fax
Address	Full mailing address
Comments	Internal notes

Linking to an Organization

The **Link to** segmented control at the bottom determines which company this contact is associated with:

Option	Effect
Shipper	Shows a Shipper picker — select the shipper company
Operator	Shows an Operator picker
Owner	Shows an Owner picker
Charterer	Shows a Charterer picker
None	Contact is unlinked (default)

Only one organization can be selected per contact. Switching category clears the previous selection.

10. Email Groups

Distribution lists used as recipient groups throughout document dispatch. Groups can be assigned to ports and clients, and selected as recipients when composing emails.

Managing Members

Bulk paste — paste semicolon-separated email addresses into the "Paste emails (semicolons)" field. Invalid addresses are skipped.

Manual add — click + **Add row** to insert a blank row, then fill in:

- **Email** — valid email address (required per row)
- **Display Name** — optional friendly label shown in recipient lists

Click the ✕ on a row to remove a member. Click **Accept** to save all changes.

11. Flags

Country flag codes for vessel registration.

Fields

Field	Notes
Name	Country name (required, e.g., "Panama", "Liberia")
Abbreviation	ISO code or custom code (e.g., "PA")
Comments	Internal notes

12. Activities

Activity types used in the SOF (Statement of Facts) timesheet. When building a SOF, every timesheet row references one of these activity codes.

Fields

Field	Notes
Name	Activity type name (required, e.g., "Loading", "Discharging")
Comments	Internal notes

13. Cargoes

Catalog of cargo types.

Fields

Field	Notes
Name	Cargo name (required, e.g., "Soja", "Maíz")
BBL Unit	Unit of measurement: BBL , MT , KG , or LT (required)
Comments	Internal notes

14. Agents

Port agents and maritime service providers.

Fields

Field	Notes
Name	Agent company name (required)
Address	Full mailing address
Contact Info	Email, phone, fax, and other contact details
Comments	Internal notes

15. Charterers

Vessel charterers — companies that hire vessels.

Fields

Field	Notes
Name	Charterer company name (required)
Address	Full mailing address
Contact Info	Email, phone, fax, and other contact details
Comments	Internal notes

16. Shippers

Companies shipping cargo via vessel.

Fields

Field	Notes
Name	Shipper company name (required)
Email	Primary email
Business Phone	Main phone
Business Fax	Fax number
Address	Full mailing address
Comments	Internal notes

17. Suppliers

Service providers and contractors (Proveedores).

Fields

Field	Notes
Name	Supplier company name (required)
Address	Full mailing address
Services	Description of services provided
KYC	Know-Your-Customer compliance notes
Phones / Emails	Contact information
Certificates	Certification and compliance document references
Rates	Rate schedules and pricing
Service Contract	Contract terms and references
Agreements	Side agreements and MOUs
Contacts	Key contact persons
Comments	Internal notes

18. Permissions Summary

Action	OPS	ADM
View list	✓	✓
Search	✓	✓
View record detail	✓	✓
Create new record	✓	✓
Edit record	✓	✓
Delete record	—	✓
Owner financial fields	—	✓ *
Email Group write	✓	✓

* The `owner.financial` permission is a fine-grained permission separate from role. ADM users have it by default; it can be granted to OPS users individually if required.

Common Tasks

Find a record quickly

Type part of the name into the **FLASH SEARCH** box in the left panel. The list filters instantly. Click the matching record to load it.

Create a new record

1. Click the entity tab.
2. Click **New** in the button bar.
3. Fill in required fields (marked *).
4. Click **Accept**.

Edit an existing record

1. Select the record from the list.
2. Modify fields in the right panel.
3. Click **Accept** to save.

Cancel unsaved changes

Click **Cancel** in the button bar. All changes since the last save are discarded.

Navigate records without the list

Use **Prior** / **Next** to step through records one by one, or **First** / **Last** to jump to the ends of the list.

Add a pier to a port

1. Select a port.
2. Scroll down to the **Piers** section.
3. Type a pier name in the "New pier name..." input.
4. Click + or press Enter.
5. Click **Accept**.

Build an email group

1. Open **Email Groups**.
2. Click **New**, enter a Name.
3. Paste semicolon-separated emails into the paste field — or click **+ Add row** to add members one by one.
4. Click **Accept**.
